Fund objective

This is a multi-asset solution with a cautious risk profile for investors that have a three-year investment horizon. The aim is twofold: to provide investment protection over a rolling one-year period, and to generate income over the medium term at low levels of risk. It invests across different asset classes with exposures of less than 40% for equities, 60% for bonds and 50% for cash. The solution is Regulation 28 compliant and may invest in listed and unlisted financial instruments (derivatives) and offshore investments to achieve its objective.

Fund manager

This solution is managed by Truffle Asset Management, a diversified boutique asset manager with an experienced investment team which has been in operation for over a decade.

Investment strategy

This solution follows a valuation-driven investment approach in every asset class (both domestic and foreign). The investment team follows a fundamental valuation-based philosophy and disciplined investment process, combined with a rigorous risk management approach to achieve the solution's dual objectives of capital protection and income generation.

Advice Fee: Any advice fee is negotiable between the client and their financial advisor. An annual advice fee negotiated is paid via a repurchase of units from the investor.

TER PERIOD: 1 July 2018 to 30 June 2021

Total Expense Ratio (TER) |1.08% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Inclusive in the TER of 1.08%, a performance fee of 0.00% of the net asset value of the class of Financial Product was recovered.

Transaction Cost (TC) | 0.60% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Total Investment Charges (TER + TC) | 1.68% of the value of the Financial Product was incurred as costs relating to the investment of the Financial Product.

The portfolio manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.

The Sanlam Group is a full member of the Association for Savings and Investment SA ("ASISA"). Collective investment schemes are generally medium- to long-term investments. Please note that past performance is not necessarily a guide to future performance, and that the value of investments /units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) (Pty) Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestmentof income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-divident date. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of the Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. A copy of the Performance Fee Frequently Asked Questions can be obtained from our website: www.sanlaminvestments.com. The portfolio management of all the portfolios is outsourced to financial services providers authorised in terms of the FAIS Act, 2002.
